Carbon monoxide is a gas created by incomplete burning of fuels. Carbon monoxide is colorless, odorless and tasteless, but highly toxic. It can build up over time, with unrecognized symptoms such as headaches, nausea, disorientation, or irritability eventually building to unconsciousness and fatal poisoning. Carbon monoxide alarms warn of the gas before it reaches dangerous levels. Examples of some carbon monoxide sources are garages, heaters, fireplaces, furnaces, appliances or cooking sources using coal, wood, oil, kerosene, or other fuels. Electric appliances are not carbon monoxide sources.

13 detectors in the Premises and in any common areas, as required by law. Any CO detectors in the Premises shall be
14 maintained by Landlord if the Premises is in a building with three or more units. If the occupant of such Premises
15 (Tenant), or any government inspector, gives written notice to Landlord that a CO detector is not functional or has been

17 notice.

18 **Tenant Responsibilities: Premises in One- or Two-Family Dwelling:** Tenant shall maintain the CO detectors in the
19 Premises. Upon discovery that a CO detector in the Premises requires maintenance, Tenant agrees to immediately
